SUMMARY

My name is Alexandru, I am a Web Developer for 2+ years, with full-stack experience, covering the full development of a web application, from the front-end to the back-end. My main technologies for development are ReactJS for Front-End and NodeJS with ExpressJS for Back-End with MongoDB/Mongoose for databases.

Certificates and diplomas regarding technical skills:

- Front-End Development Diploma
- Microsoft MTA HTML/CSS Certificate
- Microsoft MTA Javascript Certificate

WORK EXPERIENCE

Front End Developer

Digital Star | January 2022 - Present

- Handling Front End Development of websites for Digital Star's clients by implementing the design received into HTML/SASS and creating the functionalities requested by the clients, such as quizzes, validations, animations, databases submissions for forms using JavaScript library jQuery and PHP WordPress.
- Providing maintenance services for several clients, such as Ursus Breweries, Nescafe Dolce Gusto, BMW Dealers, Hochland, Mixa, Starbucks by implementing content, removing content, changing website stylesheets.
- Maintenance performed directly into code or into the CMS chosen by the client, such as Drupal, Magento or Wordpress.

Back-Up Technical Escalation Agent

Computer Generated Solution | July 2020 - February 2021

- Assisting Technical Support Agents with calls that were required escalation to a supervisor and any other inquiry.
- Assisting Sprint U.S. customers with delicate matters regarding their plans, invoices or technical related issues.

Quality Assurance Agent

Ubisoft Romania | March 2017 - June 2017

- Testing Ubisoft games in various stages of development and providing relevant feedback to the development team for improvements and fixes.

COMPLETED PROJECTS

Several Biofarm projects (Anghirol, Extravalerianic)

- Presentation website for Biofarm products such as Anghirol and Extravalerianic.
- The projects have included full responsive design using Bootstrap and SASS, from desktop to tablet and mobile, a quiz for each website created with jQuery, with maintenance platform being Wordpress with ACF written in PHP.

Muller Campaigns for Kaffee, Rizo and Pezzi

- Campaign web pages for Muller Kaffee, Rizo and Pezzi.
- The campaigns were created with full responsive design using Bootstrap and SASS, written in PHP, with the form functionality being written with Javascript (jQuery), form submission being handled by AJAX, with validation by Javascript and PHP code. The database was handled in PHPMyAdmin.

Several maintenance projects for DigitalStar clients

- Maintenance provided by me to BMW Dealers, Hochland, Mixa, DespreAlcool, Ursus Breweries.
- Adding new sections to the mentioned websites, modifying or removing content, design changes, SEO modifications, implementing features or scripts (such as TagManager), handling newsletters logistics.
